# **SITUATION SUMMARY**

#### **Cal OES SOUTHERN REGION**

### Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed there are no commercial premises currently involved and there is no public health risk due to this virus.
- 1 AmeriCorps San Diego Spanish language interpreter responded to conduct surveillance (education/outreach), with a two week rotation.
- The USDA National Incident Management Team (IMT) arrived on 06/01/18 and teamed up with CDFA personnel at the CDFA Ontario District Office.
- As new areas require surveillance, parishes in these areas will be contacted. The Cal OES AREP has scheduled vND Spanish speaking veterinarian presentations at two (2) Catholic Parishes on 06/09/18 (one mass) and 06/10/18 (three masses). As presentations are scheduled the Cal OES AREP will provide a parish bulletin announcement, announcement for the priest at mass, talking points, and all the materials that will be distributed following the masses.
- The Cal OES Agency Representative (AREP) is facilitating a contact with San Bernardino County Solid Waste Management Public Works (SWMPW) via San Bernardino County OES to determine the possibility of using sites for disposal of backyard dead birds.
  - SWMPW has prepared a draft Board agenda item pending receipt of the USDAs Agreement. USDA has located a contracting officer to begin drafting the agreement with SWMPW.
  - Landfill work group is seeking alternate sources for the disposal of dead birds. The Cal OES AREP advised Covanta Energy states they do not want to do business at this time with USDA/CDFA; Covanta has more profitable options.

### **Activations**

• San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

### **Deployments**

1 Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an AREP with an
operational period of 0700-1900 hours.

### Logistics

Per the Cal OES Southern Region AREP on 06/08/18 at 0842 hours:

- AREP continues to assist CDFA/USDA in identifying a facility to expand operations in the immediate area of the CDFA district office in Ontario, San Bernardino County.
  - USDA is inquiring with private real estate companies since they have the ability to lease directly as well as the DGS via CDFA.
- Logistics has located a facility in Rancho Cucamonga. The facility has been placed on hold. The ICP Logistics Inspection Team located space at the same complex the CDFA District Office is located. The ICP is pursuing this option instead.
- See Fire Activity slide.

#### **COASTAL REGION**

### Eastern, Vegetation Fire, San Benito County

Location: 5 miles East of Bitterwater

Jurisdiction: State DPA, SRA/FRA, San Benito-Monterey Unit/BLM Per Cal OES Duty Officers and ICS-209 as 06/09/18 at 0525 hours:

- Type 3 IC
- 553 acres, 80% contained
- Expected containment: 06/13/18
- Improve and hold containment lines. Extensive mop up due to heavy brush.

### Airline, Vegetation Fire, San Benito County

Location: 16 Miles NE of King City

Jurisdiction: State DPA, SRA San Benito Monterey Unit

Per Cal OES Duty Officers and ICS-209 as 06/09/18 at 0520 hours:

- Type 3 IC
- 1,314 acres, 80% contained
- Expected containment: 06/16/18
- Secure and improve containment lines. Mop up.

### **WEATHER OF CONCERN**

### **Weather of Concern**

- Critical red flag warning conditions will occur in the Santa Ynez Range and into the foothills above Montecito and Santa Barbara from late Saturday afternoon into early Monday morning.
  - Gusty Sundowner winds up to 60 mph or higher will be likely Saturday night into Sunday with slightly lower gusts up to 50 mph Sunday night.
  - Humidity will drop into the 15 to 30 percent range, but winds will push any fire start rapidly southward from the foothills and mountains.

## **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

\*\*\*Gusty W-SW wind combined with marginally low relative humidity (RH) east slopes of the Cascade, Sierra, and Coastal Range as well as portions of the Sacramento Valley and Foothills Saturday\*\*\*

A vigorous Pacific trough will impact the area through Sunday morning before lifting off to the north. Strengthening winds will be the main weather story Saturday before the gradient weakens some. The flow will strengthen on Saturday with peak gusts between 35 to 45 mph favoring the east slopes of the Cascade and Sierra ranges. A broader and lighter N-NW wind flow is expected on Sunday. Humidity during the afternoon's will be marginally low during the windier periods with some teen readings for a shorter duration. The other weather story will be wetting precipitation favoring the northern quarter or so of the region. Thunderstorms will be part of the mix on Saturday.

The weather models remain consistent with showing the jet and storm track lifting northward during the earlier half of next week. This means much warmer and drier conditions compared to the weekend cool down. Unfortunately, there is more model inconsistency than consistency for the latter half of next week which means a little more uncertain period. Best bet is that a Pacific wave would clip the area, provide a slight cool down and a few showers across the far north plus some modest increases in wind.

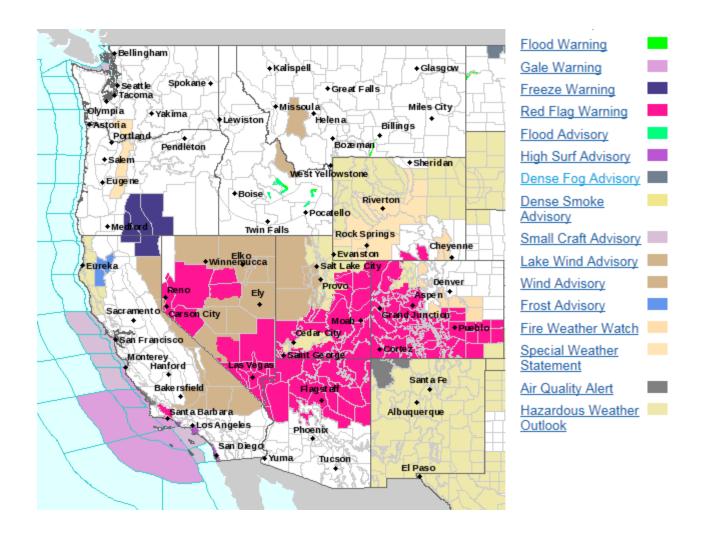

#### **SOUTHERN CALIFORNIA**

\*\*\*Strong westerly winds across the desert passes Saturday afternoon through Saturday night\*\*\*

\*\*\*Strong northerly winds across Santa Barbara County and the Grapevine Saturday night\*\*\*

A trough will move inland over the Pacific Northwest and Northern California bringing a little cooling to the area Saturday, especially across Central California. Minimum humidity will increase to 15% to 30% away from the deserts Saturday. Westerly afternoon and evening winds will increase to 20 to 40 mph with gusts to 60 mph across the desert passes and northerly night winds will increase to 20 to 40 mph with gusts to 60 mph across Santa Barbara County and the Grapevine Saturday. A ridge of high pressure to our south and east will expand toward us bringing a warming and drying trend to the region Sunday through the middle of next week. Minimum humidity will be mainly in the teens away from the coastal areas during this period. Normal westerly afternoon and evening winds of 15 to 25 mph with gusts to 40 mph will return to the desert passes Sunday through the middle of next week. A Pacific trough will drop down the West Coast which will bring the start of a cooling trend and an increase in humidity Thursday.

### **Cal OES Law Missions**

Nothing significant to report.

# **Cal OES MISSION TASKING**

### **Cal OES Missions**

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene Long-term assignment)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

### Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
